SKILLS

Frontend: ReactJs, Javascript, TailwindCSS, Bootstrap, HTML, CSS • **Backend:** ExpressJs, NodeJs, REST API's • **Database:** mongoDB • **Tools:** Git, Github, Vercel, Postman, VS Code

EXPERIENCE

Fullstack Developer Trainee, Galaxy Fintech 05/2024 – 07/2024

- Completed module-based learning in Fullstack technologies, reinforced by tests and practical tasks.
- Achieved top rankings in frontend and fullstack tests, consistently placing in the top 3 in other assessments, while successfully completing tasks in frontend, backend, and fullstack development.
- Developed client-side applications using JavaScript, HTML, CSS, Bootstrap, and a JavaScript framework and server side applications with Node.js, Express.js, and MongoDB.

Frontend Engineer, Etqan Technologies 02/2023 – 06/2023

- Designed and developed the company's website from scratch, ensuring a fully responsive and user-friendly interface.
- Built a website for a client in the cleaning industry using Bootstrap, delivering a tailored solution that met all client requirements.
- Conducted in-depth research on industry-specific needs, leading to high client satisfaction.

PROJECTS

PROMANAGE, React, Node, Express, mongoDB 

- Developed an advanced to-do app with extended functionalities: task creation, priorities, assignments, and due dates.
- Organized tasks into TODO, BACKLOG, IN-PROGRESS, and FINISHED sections with easy movement between them.
- Implemented filtering options (week, today, month) and features to collapse, edit, share, and delete tasks.
- Enabled task assignment via email dropdown and included analytics for tracking progress and performance.
- Added settings page for users to manage personal account details (password, name, email).

CineVerse, ReactJs, Redux, Firebase, Tailwind 

- Developed a movie app using TMDB API, featuring popular and trending titles exploration
- Created detailed movie pages with cast, ratings, release dates, and similar movie suggestions
- Implemented Firebase authentication for secure login and real-time rating updates to TMDB
- Utilized advanced React concepts: lazy loading, useCallback hooks, and Redux for optimization
- Enhanced user experience with infinite scrolling, GPT-powered search, and watchlist management

SWIPTORY, ReactJs, Context API, NodeJs, ExpressJs, MONGODB 

- Developed a story-sharing app for creating and sharing stories online
- Implemented backend category filtering for stories
- Integrated JWT authentication for secure access
- Added features for liking, bookmarking, and sharing stories
- Ensured full mobile responsiveness across devices

EDUCATION

B.tech in Information Technology, MGM JNEC 7.91 CGPA

08/2019 – 07/2023 | Aurangabad

COURSES

MERN Fullstack Web Development, Cuvette 

10/2023 – 04/2024

- Completed Fullstack MERN Developer program at Cuvette, excelling in module tests with top scores in HTML, CSS, JavaScript, React, Node.js, Express.js, and MongoDB.
- Delivered industry-level projects, demonstrating practical application of concepts through hands-on, project-based learning.
